Evidence Based Practice in Electrophysical Therapy:

A Global Perspective

Speaker: Dr Ah Cheng GOH

Dr. Goh is the founding president of the International Society of Electrophysical Agents (ISEPA) under WCPT. He is currently an Associate Professor in Shinshu University of Matsumoto in Japan, and as an Adjunct Research Fellow in Curtin University of Technology in Australia. His clinical and research interests focus on investigating the dosimetry of using electrophysical modalities. He is actively collaborating with researchers and clinicians to create an environment that facilitates the transition from ‘evidence’ to ‘practice’. He has delivered presentations around the Pacific Region. His talk will highlight on how physiotherapists can make good use of the published literature to allow the transition from “evidence” to “practice”. The forum will discuss on how PTs in Hong Kong can collaborate with PTs worldwide to promote the standard of electrophysical therapy in clinical practice.
